

Searching for projects and libraries

You can search for projects and libraries by name and attribute, and perform actions from the search results.

1. Select the customer.
2. Perform one of the following actions:
 - For project search, select **Project > Search Projects**.
 - **Note:** You can filter the list by selecting the project state.
 - For library search, select **Library > Search Libraries**.

A list of all the projects and libraries of the customer appears.

3. To view more details about a project or a library, select the row of the specific project or library.
