

New features and enhancements

Support for integration with InSite Prepress Portal 11.5 and MatchPrint Virtual 11.5

Integration with InSite Prepress Portal 11.5 and MatchPrint Virtual 11.5 is supported.

Support for OAuth 2.0 on email relay

OAuth 2.0 (Open Authorization) method is added as one of email relaying options (Microsoft Office 365 only)

Synchronizing OAuth email address with Administrator sender email address

When OAuth 2.0 is used for email relay, the email address entered in ICCU is used as the sender's email address and also copied to InSite Creative Administrator Email address in the Administration page.

Security Enhancements and bug fixes

[Fixed bugs in InSite Creative Workflow 11.5](#) - Please refer to the page for details.
