

Hardware and software requirements

Compatible Kodak production workflows

- Kodak Prinergy Workflow software 11.5 or later
- Kodak Prinergy Packaging Layout Automation 11.5

Floating License Manager requirements

- Kodak Prinergy Workflow software 11.x or later

System requirements

Supported operating systems	<ul style="list-style-type: none">• macOS Ventura (13.x)• macOS Sonoma (14.x)• macOS Sequoia (15.x)• macOS Tahoe (26.x)• Microsoft Windows 10 Pro• Microsoft Windows 11 Pro• Windows 10 Enterprise• Windows 11 Enterprise• Microsoft Windows 2019• Microsoft Windows 2022 <p>*Windows 10 Support and Compatibility with Pandora 11.5</p> <p>While standard support for Windows 10 from Microsoft is scheduled to end in 2025, customers may choose to purchase extended support directly from Microsoft. Windows 10 has been qualified as a client operating system for use with Pandora 11.5. However, if issues arise that appear to be related to the operating system, Kodak recommends upgrading to Windows 11 for improved support and compatibility.</p> <p>Note: The following Windows OS are not qualified: Windows 10 IoT Windows 10 IoT Enterprise Windows 11 IoT Windows 11 IoT Enterprise</p>
Memory	4 GB of RAM (available minimum)
Hard disk space	4 GB of available space
Screen resolution	1024 x 768

It is not economically possible for Kodak to individually test every processor model, subtype, or operating system, whether from Apple® or Windows®, Intel®, or AMD. We use current development hardware and software to build and test the Prinergy suite of software. We trust the millions of dollars of compatibility testing performed

by the chip manufacturers and operating system vendors to ensure that Pandora will perform correctly on all systems.

Pandora and Java

Pandora is Java-based software. The Java software can run on many different kinds of computers because it uses a “virtual machine”—a kind of translator that turns general Java instructions into commands tailored to the type of computer that you are using. For Apple Macintosh and Microsoft Windows OS-based computers, the virtual machine is Java Runtime Environment (JRE). The Pandora installer installs the virtual machine on your computer regardless of whether you already have a virtual machine. This automatic installation ensures that you have a compatible version of JRE.

Pandora and Adobe software components

Pandora 11.5 uses version 18 of the Adobe PDF Library software to read, modify, and write PDF documents.
