

Job template folder location

You can save jobs as templates and use one of those templates when you start a new job. By default, your job templates are stored in the `JobTemplates` folder, which is found at the following location:

- On a Macintosh computer: at `Applications/Pandoraversion/`
- On a Windows OS-based computer: at `C:\Program Files (x86)\Kodak\Pandoraversion\`

You can keep the `JobTemplates` folder in its default location, move it elsewhere on your computer, or move it to a network server to allow sharing among different installations of the Pandora software. You can also rename the `JobTemplates` folder. If you move or rename the `JobTemplates` folder, you need to identify the new location and new name for the folder in **Preferences**.

1. In **Preferences > General** tab, in **Folder Locations**, click **... (browse)** for **Job Templates**.
2. Depending on your operating system, perform one of the following actions:
 - On a Macintosh computer, in the Choose JobTemplates Folder dialog box, navigate to the folder where you want to keep your job templates, select the folder, and then click **Open** or click **New Folder** to create a new folder.
 - On a Windows OS-based computer, in the Browse for Folder dialog box, browse to the folder where you want to keep your marks, and click **Open**. If you want to use a new folder, create one in Windows Explorer before you open the Browse for Folder dialog box.
