

Determining the file size

To determine the size of your artwork file:

1. Open the file in Adobe Acrobat software.
2. In the Adobe Acrobat preferences, ensure that units are displayed in points.
3. Select **File > Properties**.
4. In the **Description > Advanced** area, find the first value listed for **Page Size** and divide it by two.
For example, if the page size is 6.0 x 22.0 pt, divide 6.0 by two.
