

Input file pane

The **Input file** pane shows general information about the open file. In this pane, you can perform the following functions:

File	Drag and drop a CF2 or EPS file onto the File box to open the file.
Current Item	Select the pattern/die to use for the edition. Select All to view the full file, including any changes made to the sheet size.
Show Line Type	Select the line types to be shown in color (instead of black) in the Preview pane.
Sheet size	View or change the size of the full sheet.
