

Colors

You can set display colors for guides, bleed overlaps, dies, and bleed path.

1. Select **Edit > Preferences** (Windows) or **Pandora > Preferences** (Macintosh).
2. In **Preferences**, select the **General** tab.
3. Under **Colors**, select the color square for the display element that you want to change: **Guides, Bleed overlap, Die display, Bleed path, Gap Measurement and align**.
4. In the Select Color dialog box, click the tab that offers the method of color setting that you want to use:
 - **Swatches** allows you to pick from a set of colors.
 - **HSB** allows you to manipulate the hue, saturation, and brightness to create the desired color.
 - **RGB** allows you to set proportions of red, green, and blue to create the desired color.
5. After selecting the desired color for the display element, click **OK**.
To return to the default color setting for a display element, click **Reset**.
6. (Optional) If required, repeat steps 3 and 4 for other display elements.
7. When you have set the display colors for all the elements that require changes, click **OK**.

The new settings take effect immediately.
