

# Multiple Die Align

You can align more than one supported die format (CFF2, DXF or DDES2) on your layout. Pandora will automatically position each of the dies based on the selection that you specify.

1. Select **Pandora>Preferences** (Macintosh) or **Edit > Preferences** (Windows).
2. In **Preferences**, select the **Die Settings** tab.
3. In the **Multiple Die Align** area, select one of the following options:
  - **Horizontally > Right** to place additional dies to the right of the first placed die.
  - **Horizontally > Left** to place additional dies to the left of the first placed die.
  - **Vertically > Above** to place additional dies above the first placed die.
  - **Vertically > Below** to place additional dies below the first placed die.
