

Placing objects using the Geometry palette

1. If the **Geometry** palette is not currently shown, select **Window > Show Geometry Palette**.
2. Click the object to select it.
The coordinates of the current position of the selected item appear on the **Geometry** palette.
3. Click a reference point on the diagram, and type the coordinates of the location where you want to place the object in the **X** and **Y** boxes on the **Geometry** palette. Press Enter or click in another box to apply the setting.
Tip: You can also click the object and drag it to a new location or use the arrow keys to nudge it into place.
