

Prinerger Workflow variable marks

When using Pandora integrated with the Prinerger Workflow software, you can take advantage of Prinerger Workflow variable marks. You can place these variable marks anywhere on a substrate, and when you export the layout, Prinerger Workflow will replace the placeholder text string with variable text from the Prinerger Workflow job.

Prinerger Workflow variable marks are located in the folder `Pandoraversion\Extras\Prinerger Variable Marks`. For more information about specific Prinerger Workflow variable marks, see the *Prinerger Workflow Workshop User Guide*.
