

Editing label mark settings

You can edit the properties of label marks in the Mark Settings dialog box.

You can modify the font, font style, or font size of a label mark by selecting **Edit Mark Attributes** in the **Marks** palette. If the label mark is an editable text mark, you can also modify the text in the mark.

1. On the **Marks** palette, select the mark.
2. On the **Marks** palette, click the option arrow, and select **Edit**.
3. If the mark is not an editable text mark, go to the next step. If the mark is an editable text mark, in the **Text** box of the **Attributes** area, type the required text.
4. In the **Attributes > Font** area, select a font name from the **Name** combo box.
5. In the **Attributes > Font** area, select a font name from the **Name** combo box.
6. From the **Style** combo box, select a style.
7. From the **Size** combo box, select a size.
8. Click **Save**.
